

1 F1 Pre-compression Decision Error

Wrong decision before compression

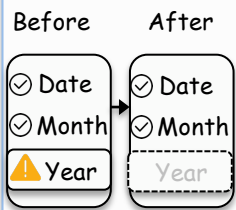

Too early summary

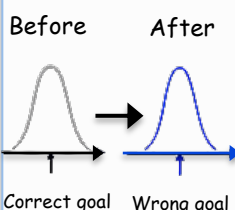

Information completeness
Future evidence truncated

Dropped hard constraint

Constraint signal
Critical constraint lost

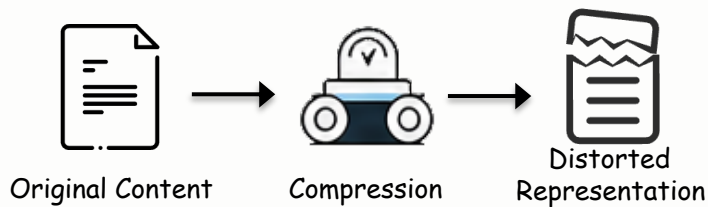

Wrong goal retained

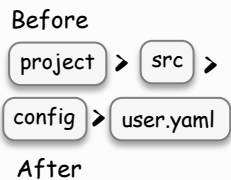

Goal relevance
Focus shifted

2 F2 In-compression Information Loss

Compression damages the representation

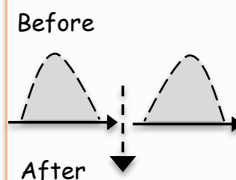

Lost file path

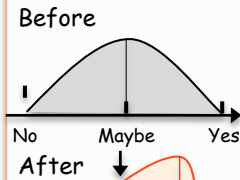

Specificity
Fine-grained paths lost

Merged two conditions

Condition distinction
Two cases collapsed

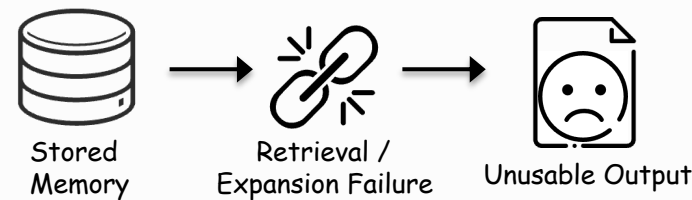

Maybe -> Yes

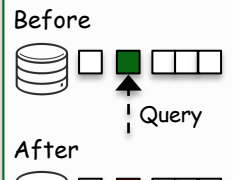

Confidence
Overconfident

3 F3 Post-compression Access Failure

Retained information cannot be recovered or used

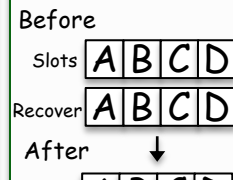

Failed retrieval

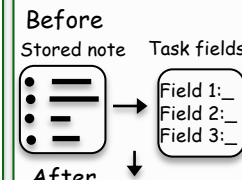

Relevant content
not recovered

Wrong reconstruction

Recovered content
shifted

Stored, not usable

Stored but
Operationally useless
